

Special Data Extraction Functions

Our new Data Recovery Copy® function acquires data from unstable hard drives by reading damaged sectors and jumping unreadable sectors to acquire all usable data on a hard drive.

- 1) **Acquire Error-Sector Data** applies read-long command to acquire data from damaged HDD sectors that cannot be read by other data acquisition tools (UNC Errors)
- 2) **Skip Unstable Sectors** automatically jumps unreadable sectors to acquire maximum data using hardware and software HDD resets to maintain HDD integrity
- 3) **Adjustable Parameters** allows user to image HDD forward & backward, extend sector-read attempts, timeouts and power on/off time to maximize acquisition

Must-Have Feature for Data Recovery

High Speed Duplication Functions

The Ninja is among the world's fastest HDD duplicators. It boasts 2 - 4 GB/min max copy speed and Data-Only Copy functions for any Operating System.

HDD Interface	SATA-I/II Native,* ATA/IDE Native, * Write Block for Suspect/Master Hard Drive
HDD Ports	Suspect (Master): 1 Target:1
HDD Compatibility	Any Manufacturer's HDD up to SATA – 144 PB Max., ATA (EIDE) 144 PTB Max.
